EDUCATION

Louisiana State University Baton Rouge, LA

B.S. Software Engineering (Computer Science), Minor in Mathematics August 2021 – May 2025

- GPA: 3.2
- **Relevant Courses:** Advanced Data Structures, Object Oriented Design, Operating Systems, Intermediate Computer Graphics, Computer Networks, Artificial Intelligence, Introduction to Database Management Systems, Cloud and Web Programming, Compiler Construction, Applied Algebra, Multidimensional Calculus, Introduction to Topology

Louisiana School for the Math, Science, and the Arts Natchitoches, LA

August 2019 – May 2021

- GPA: 3.5
- **Relevant Courses:** Intro to C++ through Game Design, Data Structures, Intro to Python, AP Java Prep

PROJECTS

Eddi - Team Size: 1

- Built a terminal-based text editor in C++ using the Notcurses library, implementing text editing, file loading/saving, and an interactive command-driven interface inspired by editors like Nano.
- Developed core editing features including UTF-8 text support, cursor navigation, viewport scrolling, line numbering, and dynamic screen rendering to provide a responsive editing experience in the terminal.
- Refactored the editor into modular, object-oriented components and implemented file operations such as creating, opening, saving, and renaming files, making the codebase easier to maintain and extend.

SongGuessr - Team Size: 3

- Engineered a full-stack web application with Flask (Python), React, and Vite that challenges users to predict the geographic origin of songs from 30-second audio previews.
- Implemented API integrations with Spotify and MusicBrainz to automate song metadata collection, filtering, and audio preview retrieval across a large music dataset.
- Delivered a functional MVP within a 36-hour hackathon by collaborating across a three-person team to define features, implement core functionality, and iterate on product requirements.

Lotus Leaf - Team Size: 1

- Engineered a BitTorrent-inspired peer-to-peer (P2P) file sharing system using Python 3, TCP sockets, and multithreading.
- Built a centralized tracker for peer discovery and metadata aggregation to enable decentralized file transfers across multiple peer nodes.
- Implemented chunk-based file downloads with round-robin peer selection and fault tolerance for peer disconnections to ensure reliable completion.
- Validated distributed behavior by simulating real-world network conditions using multiple VMware instances; tested on Windows 7 and later.

PokeBot - Team Size: 5

- Developed an event-driven Discord bot in Java (Javacord) supporting turn-based battles, trading, leveling systems, random events, and persistent user data.
- Designed modular game logic and stat systems following an Agile workflow; used Jira as a feature progress tracker across the development cycle.
- Applied Java multithreading to manage concurrent event handling and game states across multiple Discord servers simultaneously.

SKILLS & INTERESTS

Languages: C++, JavaScript, Java, Python, HTML + CSS

Tools: Git, VMware, Linux, CMake, SQL

Frameworks & Libraries: React, Next.js, Flask, Vite, Notcurses

Interests: Hero Shooters (Overwatch & Marvel Rivals), Film Photography

ADDITIONAL EXPERIENCE

Rouses' Market Covington, LA

Cashier - August 2025 – February 2026

- Processed high-volume customer transactions with low error rates while maintaining speed during peak hours.
- Trained new hires on register systems and store procedures.

Mr. Gatti's Pizza Baton Rouge, LA

Crewmember - November 2024 – August 2025

- Managed order preparation and customer service in a fast-paced, high-volume environment.
- Mentored new team members on workflows to ensure safe, productive operations.

Best Buy Baton Rouge, LA

Sales Floor Advisor - July 2024 – September 2024

- Assisted customers in selecting consumer electronics by explaining technical specifications and product comparisons.
- Collaborated with team members to meet sales targets and maintain organized product displays.

ACTIVITIES & LEADERSHIP

LSU Esports — Member, Marvel Rivals B Team March 2021 – May 2025

LSU Math Club — Club Member August 2021 – May 2025

LSMSA Ambassador April 2020 – May 2021
